

RSV 4

### TITANIUM RACING EXHAUST SYSTEM by Akrapovic

Full racing exhaust system, totally made out of titanium alloy with elliptic carbon fiber muffler. The flanges that connect the pipes to the engine's head are made out of CNC machined aluminium and the muffler bracket is made of carbon fiber. The whole kit weighs less than 5kgs and provides torque improvement from 4500 rpm, especially in the range 4500-8000 rpm, giving better acceleration out of turns. The gain in maximum power is about 6 hp, but the improvement is evident in the whole rpm range, with a maximum of + 9 hp at 7000 rpm. The 3 dedicated ECU maps, that give the best performance and keep the product's guarantee, can be downloaded from the service website as usual at time of purchase.

**Code: 894732**

### CARBON FIBER HEEL GUARDS

Made in polished carbon fiber, and fit onto the original footrests giving a better look and a weight reduction. They can also be fitted to the adjustable footrests.

Code: **895318**

---

#### CARBON FIBER HEAT PROTECTION

Made in polished carbon fiber with an inner thermal insulation layer. It fits to the original muffler giving a sporty look and weight reduction.

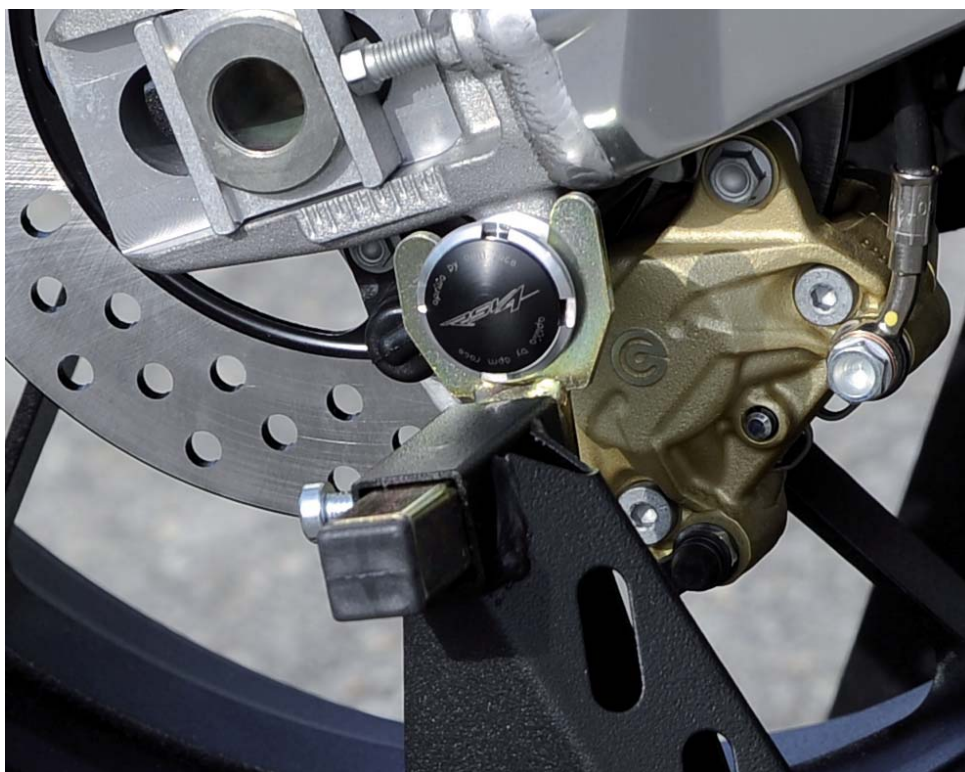

Code: **895319**

### SERVICE STAND

Constructed from high grade, powder coated steel, and fitted with nylon wheels with bearings. Side plate sporting laser cut RSV4 logo.

Code: **894870**

### Rear Stand Pick Up Knobs

Made from CNC machined billet aluminium by DPM race in collaboration with Aprilia. Ensure maximum stability of your RSV4 while on a rear stand with these secure pick up knobs.

Code: **895321**

---

### BIKE COVER

Protect your Aprilia RSV4 with this dedicated bike cover; made in black and red with Aprilia RSV4 logo.

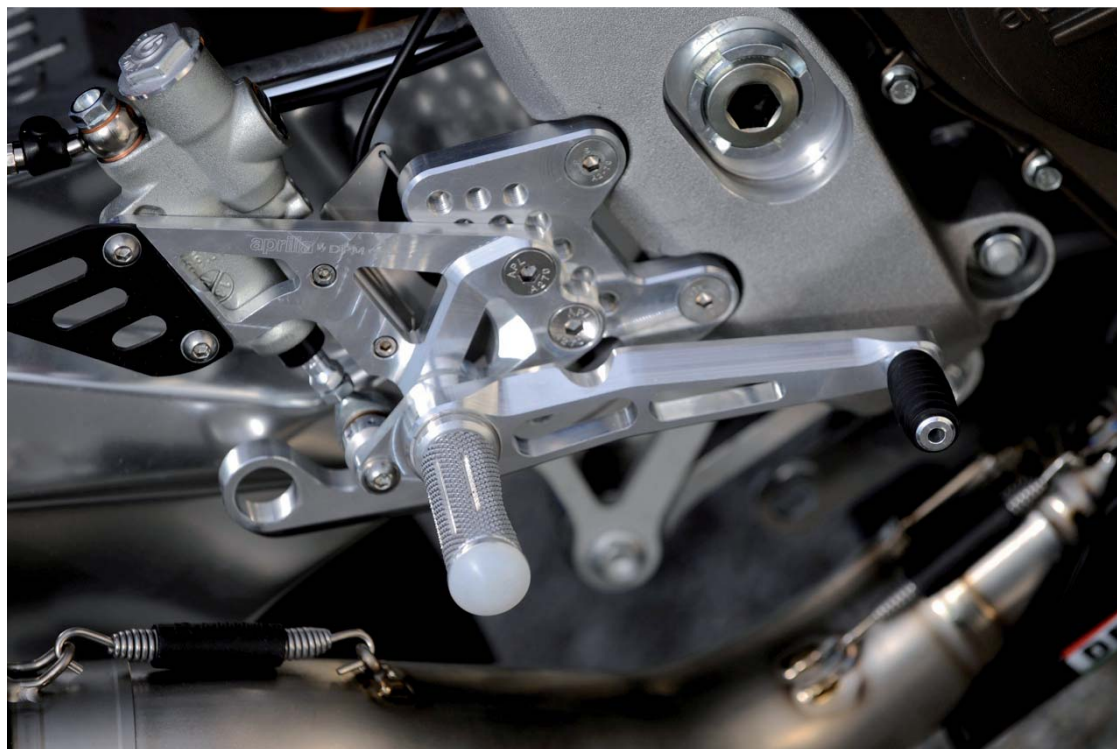

Code: **894866**

### OHLINS TTX REAR SHOCK

Specially developed for RSV4 Factory, fully adjustable, and can be fitted with stroke sensors. Head and end brackets made out of CNC machined aluminium.

Code: **894912**

### ADJUSTABLE FOOTRESTS

Made from CNC machined aluminium, the footpegs can be adjusted to 9 different positions, while a micrometric regulation allows a fine adjustment of gear and rear brake levers. They keep the original brake light switch and allow the use of the reverse shift command, and are suitable both for original and Akrapovic exhausts.

Code: **894864**

### Handlebar End Caps

Customise the handlebars with these CNC machined billet aluminium handlebar end caps by DPM race, in collaboration with Aprilia. Complete with Nylon protection ends with RSV4 logo.

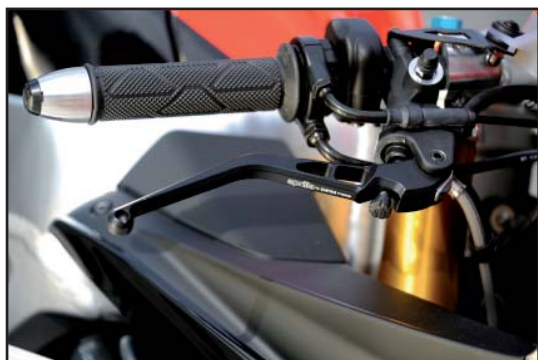

Code: **895326**

## CRASH PADS

Made from CNC machined nylon, on a CNC machined aluminium base. Protect the fairing in event of a crash and are fully integrated into the bike's design thanks to the triangular shape. They also allow the perfect centering to the fairing thanks to the micrometric adjustment.

Code: **894863**

## CLIPON BARS

Clip on bars made out of CNC machined aluminium, SS bars, provide improved racing control being completely adjustable in height, depth and openness for a perfect riding position.

Code: **894865**

#### RACING SCREEN

2mm thick polycarbonate screen, greatly improves aerodynamic penetration and comfort at high speed.

Code: **894862**

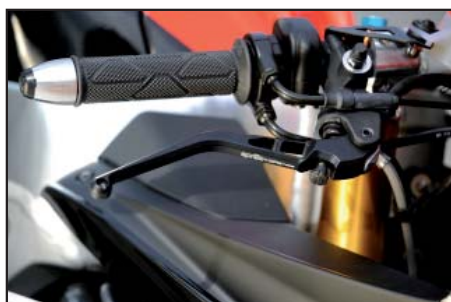

---

### CNC Machined Mirror Plugs

For use when mirrors removed for racing or track day events to cover the mirror mount hole to ensure maximum security of the front fairing and improved aerodynamics. Made from CNC machined billet aluminium by DPM race in collaboration with Aprilia

**Code:** 895320

**CNC MACHINED Aluminium Brake Lever**

Adjustable racing brake lever made from CNC machined billet aluminium by DPM race in collaboration with Aprilia.

**Code: 895324**

**CNC MACHINED Aluminium Clutch Lever**

Adjustable racing clutch lever made from CNC machined billet aluminium by DPM race in collaboration with Aprilia.

**Code: 895325**

### Adjustable Number Plate Bracket

Fully adjustable number plate holder for perfect desired positioning of the number plate. Made from CNC machined billet aluminium by DPM race in collaboration with Aprilia.

Note: Refer to your local state laws for use of this item.

Code: **895323**

### License Plate Holder Cover

For use when license plate holder removed for racing or track days to cover the plate holder mounting hole for a streamlined effect of the rear fairing. Made from CNC machined billet aluminium by DPM race in collaboration with Aprilia.

Code: **895322**
